POETRY.

WOMAN'S FIDELITY.—From the Spanish.

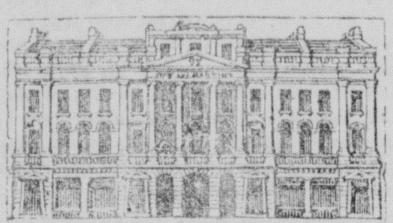

One eve of beauty, when the sun,
Was on the streams of Guadaluver,
To gold converting, one by one,
The ripples of the mighty river;
Beside me on the bank was seated,
A Seville girl with auburn hair,
And eyes that might the world have cheated,
A wild, bright, wicked, diamond pair!
She stooped, and wrote upon the sand,
Just as the loving sun was going,
With such a soft, small, shining hand,
I could have sworn 'twas silver flowing.
Her words were three, and not one more,
What could Diana's motto be?
The Siren wrote upon the shore—
Death, not inconstancy!

WATCH-MAKING AT GENEVA.

Of all the mechanical and handicraft employments of the Swiss people, there are none more interesting, in the details of occupation and result, than that of watch-making, with its numerous divisions and subdivisions. The day after I arrived at Geneva, I received a letter addressed—

A Monsieur,
Monsieur Milord—
&c. &c. &c.

This letter was neither more nor less than an elegy on the super-excellence of the watches and jewellery of one of the most extensive horologists in the town. It was impossible to make any article superior to, or as cheap as his, for he surpasses all the world as a manufacturer! This trade, puff, however, was a test to inquire further into the extent of an ingenious branch of industry, that has enriched thousands in the cantons of Geneva and Neuchâtel. The Genevese commenced watch-making about two hundred and fifty years ago, and from that period they contrived to excel all other nations in the beauty of their workmanship until the year 1787, when they reached the *acme* of prosperity; the master manufacturers employing more than four thousand workmen in the city, and about two thousand in their auxiliary workshops at Cluse, Vevey, and St. Croix. Clock and watch-making commenced amid the ravines of the Jura, in the canton of Neuchâtel, about the middle of the last century. The business increased rapidly in consequence of disturbances which expelled a great number of Genevese artisans from their city. The establishment at Locle and Chaud de Fonds have given employment to, and enriched a population, which has more than quadrupled since this profitable branch of ingenious industry commenced, to which has since been added curious works in wood, ivory, shells, &c. rents are, in consequence, higher in that wild valley than in the most fertile plain; and never did hydraulic ingenuity succeed in a more daring attempt than in constructing the subterranean mills, where the river Bied has been conducted by a tunnel cut about one thousand one hundred feet through the rocky mountain. The watch-makers of the Jura are adepts in manufacturing to suit the taste of all nations. Simple solid watches for Holland, Germany, and the United States—watches enamelled and enriched with pearls, for Spain and Italy—large watches with gilded copper cases, ornamented with Mahometan devices, for the Turkish market—and those of every fanciful fashion to suit the caprices of France and England. The computed number of watches exported annually from the canton of Neuchâtel, is stated by Picot at one hundred and thirty thousand, the most part of which are in gold cases, besides about one thousand clocks (the prices of the watches are from about six shillings to about twenty-four pounds sterling each); about one hundred and thirty thousand pounds' weight of the parts of watches and clocks, and of tools for watch-makers, are also exported annually. Seventy thousand watches, chiefly gold, and ladies' watches, are said to be made in Geneva annually, but these statements appear to me vague—and upwards for vegetal e according to the preparation.

100 CASKS OF DAY & MARTIN'S GENUINE JAPAN BLACKING constantly on hand, for sale by their Agent, J. A. DICKSON, at the Music Saloon and London Importing Warehouse, No 36 Cornhill, (or merly Market st.)

The casks are variously assorted, to accommodate retailers, and the Blacking will be warranted in good order.

BOSTON MORNING POST.

SATURDAY, MARCH 5, 1836.

DEMOCRATIC MEETING.

At a meeting of the Democratic members of the Massachusetts Legislature, held at the Old Court House in Boston, on Thursday evening, March 3d, 1836, the Committee appointed at a former meeting to report suitable candidates for Electors of President and Vice President of the United States, to be supported at the election in November next, reported the following names, which were severally adopted by the meeting, unanimously, viz.—

FOR ELECTORS AT LARGE.

HON. NATHAN WILLIS, of Pittsfield.
HON. SETH WHITMARSH, of Sekonk, for District.

No. 1, CALEB EDDY, of Boston.
2, ROBERT RANTOUL, of Beverly.
3, JOSEPH KITTREDGE, of Andover.
4, FRANCIS TUTTLE, of Acton.
5, SAMUEL TAYLOR, of Sutton.
6, SAMUEL C. ALLEN, of Northfield.
7, JOSEPH FITCH, of New Marlborough.
8, HARVEY CHAPIN, of Springfield.
9, BENJAMIN P. WILLIAMS, of Roxbury.
10, NATHAN C. BROWNELL, of Westport.
11, THOMAS MANDELL, of New Bedford.
12, JABEZ P. THOMPSON, of Haddam.

On motion of Mr. Rantoul, of Gloucester, it was—

Voted, That the foregoing nominations of Electors for the several Districts, be submitted to the consideration of such of the said several districts as may see fit to call meetings for that purpose; and that meetings so called, which may hereafter consider these nominations, be requested to forward the result of their deliberations to the State Committee.

Voted, That the doings of this meeting, signed by the Chairman and Secretary, be published in all the Democratic papers in the Commonwealth.

JOSIAH CALDWELL, Chairman.

HENRY CROCKER, Secretary.

Nomination of Electors.—It is with high gratification that we are enabled to lay before our readers this morning the doings of the Democratic members of the Legislature on Thursday evening last. The nominations of candidates for the important offices of Electors of President and Vice President, have been made in a manner that we are confident will meet the cordial approval of the Party throughout the Commonwealth, and unite the entire Democracy of Massachusetts in their support. Never has our party before, for the past ten years, occupied so gratifying a position as it does at this moment. The Ticket for Electors, nominated by the Legislative Caucus, cannot fail to combine the whole strength of the friends of the National Administration, and with harmony of action, and the zeal the importance of the contest will inspire, we can not fail of success.

The following is the letter alluded to in Dr Howe's communication, published in Wednesday's Post, and should have appeared at the same time.

BOSTON, 29th Feb. 1836.
Dear Sir—Of the case of Mrs. Patten, to which you referred in late conversation, I am able to give you the following account, for the accuracy of which her family and friends will vouch.

Mrs P. has been afflicted for some years with an extreme sensibility of the optic nerve, attended with some dimness of vision; but during the last winter her eyes have been in a more comfortable state than at any period for two years. She has been able to bear a moderate degree of light, to go abroad, attend church and visit her friends.—This was the state of her eyes, until she was persuaded, contrary to the dictates of her own judgment, to apply to a man of the name of Williams, who came here with great pretensions to extraordinary skill in treating diseases of the eye.

This unprincipled and nefarious quack, undertook to effect a cure by means of remedies to be applied to the eyes. The first application was not attended with any sensible ill effects. The second, however, produced extreme pain and distress of the eyes, and the third (and last to which the patient could be induced to submit) increased the distress to an excessive degree. The patient was obliged to confine herself in a dark chamber, and to protect her eyes from the slightest ray of light, with thick and impenetrable bandages. Such was the excruciating nature of the disease that now raged in the eyes, that for many nights the patient was not able to obtain a moment's rest.

This circumstance was stated by one who was a witness of the sufferings of Mrs P. on the occasion.

Much distress has now continued for six or seven weeks, and I have only farther to add, that many months will elapse before this patient's eyes can be restored to the state in which they were, previous to the trial of this rash and unwarrantable experiment.

EDWARD J. DAVENPORT.

Dr. S. G. HOWE.

Progress of Fanaticism.—A Society has recently been formed in New York, under the auspices of Arthur Tappan, for the occupancy of the Fifth Free Church, which has been built chiefly by his munificence. Among the articles of the association which have been adopted, is one prohibiting the forming of any connexion in business with an unbeliever or non-communian. A gentleman who proposed joining the society, inquired if this article would debar him from assisting or entering into business with his son, who was a young man of good character, although not a professor. He was answered that it would, and that instead of aiding, he should "crush him, and break him down." This is a new kind of Christianity, which will hardly flourish in a civilized community.

The Advocate mentions that the freedom of the Warren Bridge is owing to the firmness of the Democratic Senators. Those gentlemen deserve great credit for their exertions, and it is not their fault if they are outvoted, as they are sometimes. But the Democratic members of the House ought to enjoy the share of praise which properly belongs to them for bringing about this result. The order to bring in a bill continuing the tolls on Warren Bridge actually passed the Senate, it should be recollect, and came down to the House on Friday, where it was rejected, by a majority of more than forty votes, and again upon a motion to reconsider, rejected by a much larger vote than at first, after a very animated debate, lasting through most of the sitting, and in which our Democratic friends, were as usual, found on the right side.

The Silver Vase, made for Mrs. Smith, was presented to her on Thursday, at her residence, by a Committee of the subscribers. They could not have found an individual more worthy, in every respect, of the compliment.

The Wandering Piper has distributed nearly \$500 among the different charitable institutions of Baltimore. It is seldom that a man who *blows* it so much is so benevolent.

The members of the Legislature, friendly to the election of Mr. Webster to the Presidency, have obtained the use of the Representatives Hall on Thursday evening next, for the purpose of holding a Convention.

The attempt to negotiate the New York City Water Loan, in Europe, has not been successful.

POLICE COURT.

Sailors and their Wives.—William Heeves is a sailor in thought word and deed—a sailor in manners, morals, dress, and bearing; thus is, he bows and swears in the same breath, and celebrates the termination of each successive voyage in a flowing can of grog; he is happy, too, in a luxuriant—aye, magnificent growth of whiskers, which unmercifully envelope his cheeks, and meet under his chin, where they bush out in every direction, like dark shrubbery round the mouth of a cavern. Viewed laterally and disjunctively, each looked like nothing under the sun, save an enormous swall, fitted only for swabbing the decks of a line-of-battle ship. He wore a red flannel shirt, a blue jacket, and keeps his duck trousers in position, by a leather strap, above his hips, buckled in front; and in navigating the choppy and channels of the City, he contrives to occupy both sides of the way, by constantly tacking, and running foul of every thing he meets or overtakes. His hair—perhaps *neat*?—if not, it is mongrel—a cross between "Saxon" and "Guinea,"—was plaited with great care, and being gathered back, displayed a noble brow—a front for phenologists to marvel at:—those who have seen Cooper in Othello, have seen the man we wot of. In complexion, he was not more brown, but more uniformly dyed, than a sun-burnt European. The "dyeing in the wool," made the difference. To classify his color, it may be set down to be a shade darker than an eminent politician's, but not so black as said politician's presidential prospects. This "beauty without paint," had a wife—a very pretty little woman, with a form like a sylph, and a foot that might shame the pedal extremes of a Chinese belle. Her features were small, and particularly regular—and her complexion was one shade lighter than a lump of coal in a cloudy day—she was barely visible, when viewed obliquely, and the sun's rays playing on her face diagonally. The tender relation in which this remarkable couple stood towards each, as man and wife, gave birth to a circumstance, which resulted in the arrest of William, and brought him before the court as a culprit.

Some months ago, Heeves, preparatory to embarking on a voyage to Europe, hired a snug room for his wife, and gave her a carte blanche on a grocery and provision store, in order that she need not lack for the good things of this life during her temporary widowhood. There was of course an implied understanding, that this card did not extend to acts prohibited by the law-conjugal. Having thus furnished his wife with the means of obtaining every thing a faithful wife could desire, he bade her adieu, and his vessel spread her white wings for Europe. The voyage—a wintry one—was tempestuous and tedious—and tried the timbers of ship and sailors, and Heeves' station before the man was one of toil and suffering.

Day after day, night after night, did he keep his watch, hourly overwhelmed with avalanches of brine. Unflinchingly did he discharge his duty, even while the stubborn rigging was frozen stiff, and the slippery deck a continuous sheet of ice. Nor did his terrors and sufferings lessen as he approached his home; but as his vessel neared the New England Coast—

"Lou! hissed the sea beneath her lee—the little bark flew fast;

But faster still the rushing storm came borne upon the blast. Lord! what a roaring hurricane beset the straining sail!

What tempest sheet, with level drift, and fierce assaults of hell!

What darksome caverns yaw'd before! what jagged steepes behind!

Like battle-steeds, with foamy manes, wild tossing in the wind.

Each after each sank down astern, exhausted in the chase; But where it sank another rose, and galloped in its place; As black as night—they turned to white, and cast against the cloud;

A suny sheet, as if each surge up-turned a sailor's shroud!

"Lou! hissed the sea beneath her lee—the little bark flew fast;

But faster still the rushing storm came borne upon the blast. Lord! what a roaring hurricane beset the straining sail!

What tempest sheet, with level drift, and fierce assaults of hell!

What darksome caverns yaw'd before! what jagged steepes behind!

Like battle-steeds, with foamy manes, wild tossing in the wind.

A suny sheet, as if each surge up-turned a sailor's shroud!

"Lou! hissed the sea beneath her lee—the little bark flew fast;

But faster still the rushing storm came borne upon the blast. Lord! what a roaring hurricane beset the straining sail!

What tempest sheet, with level drift, and fierce assaults of hell!

What darksome caverns yaw'd before! what jagged steepes behind!

Like battle-steeds, with foamy manes, wild tossing in the wind.

Each after each sank down astern, exhausted in the chase;

But where it sank another rose, and galloped in its place;

As black as night—they turned to white, and cast against the cloud;

A suny sheet, as if each surge up-turned a sailor's shroud!

"Lou! hissed the sea beneath her lee—the little bark flew fast;

BOSTON AND BOSTON PACKETS

The Regular Line of Packets between the above cities, will consist of the following vessels:

Schooner ANN, - - - - -	Captain Flower,
CHINA, - - - - -	Churchill,
LYDIA, - - - - -	John,
MARY, - - - - -	Hall,
ECHO, - - - - -	Broadbent,

These vessels are of the first class, and built expressly for the trade. The captains have been long engaged in the business, and are experienced pilots. Every exertion will be made to ensure despatch and render this line worthy of patronage. It is intended, that the entire March, vessels shall sail every Saturday, from the head of Broad Street, Boston, and one from Hartford every Wednesday. Terms of freight apply to JOSHUA SEARS, No 14 Long wharf, HARTFORD, & ELLIS, No 7 Central wharf, or the Captain, on board, head of said wharfs outside, and in Hartford THOMAS K. BRUCE & CO.

127

HIGHLY IMPORTANT.

ELTERS PATENT have been granted the Charles Lang for important improvements in the construction of GRATES for BURNING ANTHRACITE COAL and WOOD, in open fire places, on a new principle. By these improvements in the LANE GRATE, combustion being supported by heated air, the most stubborn anthracite coal can be so easily ignited that the SURFACE of the fire presents the same heat as that exhibited by the interior. In this Grate water-tubes and air-tubes, whose important desiderata, are obtained, whereby those who object to the destruction of furniture by shrinking, injury to laundry, &c., the difficulty experienced by some persons in breathing a dry atmosphere, heated by anthracite coal, are completely removed. This Grate, for cleanliness, surpasses any fire-place, grate, or stove for burning any kind of fuel, and being got up in an elegant style, will supersede those of other descriptions now in use.

The undersigned having purchased the PATENT RIGHT for the United States, have made extensive preparations for the manufacture of the LANE GRATE, and will receive orders at 22 School street, for the same, and at 6 Congress street, (up stairs) where the public are invited to call and see one in operation.

The undersigned are now manufacturing a complete assortment of LANE PATENT GRATES, from 12 to 20 inch fire, suitable for Parlor, Chambers, Basements, and Kitchens. For INSURANCE and REVENGE ROOMS, it will be found the most pleasant, as it is the most economical Grate that can be used, the price varying from \$6.00 to \$20.

ELTERS, - - - - - Every infringement of the Patent right will be prosecuted to the extent of the law; and PURCHASERS are reminded that they are liable for damages for purchasing the LANE PATENT GRATE of any INFRINGER of the Patent Right, and will be dealt with accordingly.

ENOCH W. PERRY, Proprietors of W. PERRY & CO.

BENJ. THOMAS, Patent Right.

epm—nig

A MEETING of the UNITED BENEVOLENT SOCIETY OF JOURNEYMAN TAILORS* of Boston, held on the 24th, the following Preamble and Resolutions were adopted:

Whereas, we have associated ourselves for the purpose of relieving our mutual misfortunes.

And whereas, it adds much to the calls upon our Society to have its members discharged from their employment in the middle of winter, to make room for girls—and that, too, without a cent.

And whereas, the public are induced to suppose that many firms in this city permanently employ men—instead of which they only do so occasionally.

Resolved, That we will publish in the papers, a list of the names of the proprietors of tailoring establishments who are in the constant habit of employing men, that the public may know at what shop their work will be done in a thorough and workmanlike manner.

Resolved, That the above Preamble and Resolutions, together with the list of said firms, be published in the Daily Evening Transcript, Boston Morning Post, Commercial Gazette, and Patriot & Chronicle.

BENJAMIN HEELY, President

JOHN PALMER, Vice President.

JOB F. HALL, Secretary.

List of those who employ Men.
